

LEVESOL® DFC

FEATURES AND BENEFITS

Chelating agent designed for use with dry starter fertilizer.

- Makes phosphorus, zinc and other key micronutrients more available to the plant.
- Enhanced nutrient availability increases early growth, overall plant health, and ultimately yield.
- Has three modes of action: it unlocks nutrients in the soil, it allows the nutrients to stay available for longer, and is mobile in the plant for season-long activity.

ACTIVE INGREDIENTS

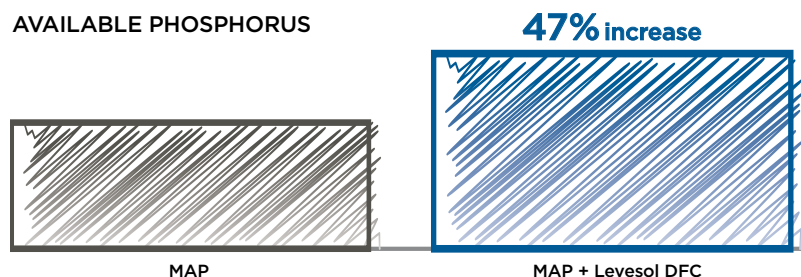

- Total Nitrogen (N)..... 2%
 - 1.5% Urea Nitrogen
 - 0.5% Ammoniacal Nitrogen

Derived from: urea and ortho-ortho EDDHA.

APPLICATION DIRECTIONS

- **For use as fertilizer impregnation**
Apply 3-4 qt/ton to dry phosphorus-based starter fertilizer programs.
Optimum applications are as an in-furrow, 2x2 or banded application.

AVAILABLE PHOSPHORUS

CROPS

PACKAGE SIZE | 2x2.5 gal | 264 gal
